

# Safety data sheet

Page: 1/9

BASF Safety data sheet  
Date / Revised: 03.08.2011  
Product: **EMACO T920**

Version: 1.0

(30431726/SDS\_GEN\_AU/EN)

Date of print 04.08.2011

## 1. Substance/preparation and company identification

### EMACO T920

Use: Product for construction chemicals

Company:

BASF Australia Limited (ABN 62 008 437 867)  
Level 12, 28 Freshwater Place Southbank  
Victoria 3006, AUSTRALIA  
Telephone: +61 3 8855-6600  
Telefax number: +61 3 8855-6511

Emergency information:

BASF Emergency Advice Number: 1800 803 440 (24h) [within Australia]  
BASF Emergency Advice Number: + 61 3 8855 6666 [outside Australia]

## 2. Hazard identification

HAZARDOUS SUBSTANCE, NON-DANGEROUS GOOD

Irritating to respiratory system and skin.

Risk of serious damage to eyes.

Keep out of the reach of children.

Do not breathe dust.

Avoid contact with skin and eyes.

In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

After contact with skin, wash immediately with plenty of water and soap.

Take off immediately all contaminated clothing.

Wear suitable gloves and eye/face protection.

If swallowed, seek medical advice immediately and show this container or label.

### 3. Composition/information on ingredients

#### Chemical nature

modified cement mortar

#### Hazardous ingredients

Quartz (SiO<sub>2</sub>)

Content (W/W):  $\geq 50\%$  -  $\leq 75\%$   
CAS Number: 14808-60-7

Portland cement (< 2ppm Cr VI)

Content (W/W):  $\geq 25\%$  -  $< 50\%$   
CAS Number: 65997-15-1

The wording of the hazard symbols and R-phrases is specified in chapter 16 if dangerous ingredients are mentioned.

---

### 4. First-Aid Measures

General advice:

First aid personnel should pay attention to their own safety. Remove contaminated clothing.

If inhaled:

After inhalation of dust. Keep patient calm, remove to fresh air. If difficulties occur: Obtain medical attention.

On skin contact:

After contact with skin, wash immediately with plenty of water and soap. Under no circumstances should organic solvent be used. If irritation develops, seek medical attention.

On contact with eyes:

Wash affected eyes for at least 15 minutes under running water with eyelids held open, consult an eye specialist.

On ingestion:

Rinse mouth immediately and then drink plenty of water, seek medical attention. Do not induce vomiting unless told to by a poison control center or doctor.

Note to physician:

Symptoms: Eye irritation, skin irritation, irritation of the mucous membranes

Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

---

## 5. Fire-Fighting Measures

### Additional information:

Product itself is non-combustible. Only the packaging materials can catch fire. The generally usual extinguishing agents to esteem for sufficient.

### Specific hazards:

Product is not combustible or explosive. No particular hazards known.

### Further information:

Product itself is non-combustible; fire extinguishing method of surrounding areas must be considered. The degree of risk is governed by the burning substance and the fire conditions. Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

---

## 6. Accidental Release Measures

### Personal precautions:

Avoid dust formation. Avoid contact with skin and eyes. Use personal protective clothing. Handle in accordance with good building materials hygiene and safety practice.

### Environmental precautions:

No special precautions necessary.

### Methods for cleaning up or taking up:

Sweep/shovel up.

---

## 7. Handling and Storage

### Handling

Avoid dust formation. The Cement contained in this product reacts alkaline when in contact with water or humidity. This may cause severe irritation of skin or mucous membranes. The humidity of the skin or mucous membranes is enough for this reaction. Prolonged direct contact to the dry product should be avoided therefore. Avoid inhalation of dusts. Avoid skin contact. Pour downwind and allow as little free fall as possible while emptying bags into equipment. Breathing must be protected when large quantities are decanted without local exhaust ventilation.

### Protection against fire and explosion:

No special precautions necessary.

### Storage

Suitable materials for containers: paper

Further information on storage conditions: Containers should be stored tightly sealed in a dry place.

---

## 8. Exposure controls and personal protection

### Components with workplace control parameters

Quartz (SiO<sub>2</sub>), 14808-60-7;

TWA value 0.1 mg/m<sup>3</sup> (OEL (AU))  
(OEL (AU)), dust

Included in the regulation, but with no data values - See the regulation for further details

Cement, portland, chemicals, 65997-15-1;

TWA value 10 mg/m<sup>3</sup> (OEL (AU)), Inhalable dust

TWA value 1 mg/m<sup>3</sup> (ACGIHTLV), Respirable fraction

The value is for particulate matter containing no asbestos and <1% crystalline silica.

### Personal protective equipment

Respiratory protection:

Breathing protection if dusts are formed.

Hand protection:

nitrile coated cotton gloves (e.g. EN 388, 374)

Eye protection:

Tightly fitting safety goggles (splash goggles) (e.g. EN 166)

Body protection:

Body protection must be chosen based on level of activity and exposure., light protective clothing

General safety and hygiene measures:

Avoid contact with the skin, eyes and clothing. Avoid inhalation of dusts. In order to prevent contamination while handling, closed working clothes and working gloves should be used. Handle in accordance with good building materials hygiene and safety practice. When using, do not eat, drink or smoke. Hands and/or face should be washed before breaks and at the end of the shift. At the end of the shift the skin should be cleaned and skin-care agents applied. Gloves must be inspected regularly and prior to each use. Replace if necessary (e.g. pinhole leaks).

---

## 9. Physical and Chemical Properties

Form: powder  
Colour: grey  
Odour: characteristic

pH value: >= 11  
(>= 1 %(m), 20 °C)  
of low solubility

: not applicable

BASF Safety data sheet  
Date / Revised: 03.08.2011  
Product: **EMACO T920**

Version: 1.0

(30431726/SDS\_GEN\_AU/EN)

Date of print 04.08.2011

Flash point:	
Flammability:	not applicable
Lower explosion limit:	does not ignite
Upper explosion limit:	not applicable
Self ignition:	not applicable
Self heating ability:	not self-igniting
Explosion hazard:	It is not a substance capable of spontaneous heating.
Fire promoting properties:	not explosive
Vapour pressure:	not fire-propagating
Density:	not applicable
Bulk density:	2.47 g/cm <sup>3</sup> (20 °C)
Miscibility with water:	1,500 - 1,900 kg/m <sup>3</sup>
Hygroscopy:	not (e.g. <10%)
Viscosity, dynamic:	Non-hygroscopic
Solids content:	not applicable
	100 % (calculated)

**Other Information:**

If necessary, information on other physical and chemical parameters is indicated in this section.

---

## 10. Stability and Reactivity

**Conditions to avoid:**

See MSDS section 7 - Handling and storage.

Thermal decomposition: No decomposition if stored and handled as prescribed/indicated.

**Substances to avoid:**

strong bases, strong acids

Corrosion to metals: No corrosive effect on metal.

**Hazardous reactions:**

The product is stable if stored and handled as prescribed/indicated.

No hazardous decomposition products if stored and handled as prescribed/indicated.

---

## 11. Toxicological Information

### Acute toxicity

Assessment of acute toxicity:

The product has not been tested. The statement has been derived from products of a similar structure or composition.

LD50 (oral): > 5,000 mg/kg

No systemic toxicity.

### Irritation

Assessment of irritating effects:

Causes temporary irritation of the respiratory tract. Skin contact causes irritation. May cause severe damage to the eyes. The product has not been tested. The statement has been derived from products of a similar structure or composition.

Primary skin irritation: Irritant.

Primary irritations of the mucous membrane: Risk of serious damage to eyes.

### Sensitization

Assessment of sensitization:

Chromate in this product has been reduced. Sensitization due to chromate within stated shelf-life is unlikely.

### Repeated dose toxicity

Assessment of repeated dose toxicity:

The product has not been tested. The statement has been derived from the properties of the individual components.

### Genetic toxicity

Assessment of mutagenicity:

The product has not been tested. The statement has been derived from the properties of the individual components.

### Carcinogenicity

Assessment of carcinogenicity:

The whole of the information available provides no indication of a carcinogenic effect.

### Reproductive toxicity

Assessment of reproduction toxicity:

The chemical structure does not suggest such an effect. The product has not been tested. The statement has been derived from the properties of the individual components.

### Developmental toxicity

**Assessment of teratogenicity:**

The chemical structure does not suggest such an effect. The product has not been tested. The statement has been derived from the properties of the individual components.

**Other relevant toxicity information**

Based on our experience and the information available, no adverse health effects are expected if handled as recommended with suitable precautions for designated uses. The product has not been tested. The statements on toxicology have been derived from products of a similar structure and composition.

---

**12. Ecological Information****Ecotoxicity****Assessment of aquatic toxicity:**

There is a high probability that the product is not acutely harmful to aquatic organisms. The product gives rise to pH shifts.

**Aquatic invertebrates:**

LC50 (48 h) > 100 mg/l, *Daphnia magna* (static)

**Aquatic plants:**

EC50 (96 h) > 100 mg/l (growth rate), *Selenastrum capricornutum* (static)

**Soil living organisms:**

LC50 (10 d) 9,931 mg/kg, other soil dwelling arthropod

**Mobility****Assessment transport between environmental compartments:**

The substance will not evaporate into the atmosphere from the water surface.

Following exposure to soil, adsorption to solid soil particles is probable, therefore contamination of groundwater is not expected.

**Persistence and degradability****Assessment biodegradation and elimination (H<sub>2</sub>O):**

Inorganic product which cannot be eliminated from water by biological purification processes. The product is slightly soluble in water. It can be largely eliminated from the water by abiotic processes, e.g. mechanical separation.

Experience shows this product to be inert and non-degradable.

**Elimination information:**

not applicable

**Bioaccumulation potential****Assessment bioaccumulation potential:**

The product will not be readily bioavailable due to its consistency and insolubility in water.
